

Services Summary

We offer a full complement of computer repair and services in store and on site, including computer programming, data forensics, security systems, Web site design, and business continuity plans in partnership with top consultants. Owner Mark Deaver's unique educational background focusing on science, technology, design, security, and business, makes him a valuable consultant on a wide range of topics necessary to keep modern businesses competitive, and many of the consultants with whom we partner hold advanced degrees in their field of expertise coupled with real world experience.

“Norman Computers are always available to take care of our emergencies, even on short notice. [They] helped us plan out our technology needs for the future in order to keep us operating efficiently as our needs increase.”

- Dillard Group

We Work For You

Norman Computers provides quality service and support for all your technology needs. Founded in 2000, we quickly became one of Oklahoma's premiere computer service centers. Our top quality computer technicians and partners provide you with friendly, knowledgeable, professional service. Our competitive rates provide you excellent value for quality service. We work around your schedule to minimize down time, even if that means working late nights or weekends. Best of all, we know how precious your time is, so we do it right the first time, so you can get back to the things that matter to you!

Don't worry; we'll fix it.

- system optimization and maintenance to increase your productivity and system's value.
- custom designed computer systems that can grow with you from office computers to gaming rigs to high availability servers.
- new, off-the-shelf computers.
- refurbished computers.
- new and used parts.

“Jon has a brilliant mind for technology and is very direct about his problem solving methods and explanations.”

Mark Deaver, Owner

On Site Services

Norman Computers offers 24 hour emergency service to keep your business running smoothly. These services include:

- on location service at your business or home office.
- training for you and your staff on your equipment, at your location.
- networking services at your business or home office.
- installation of cable and telephone lines.
- technology consulting, forensics, and security evaluations

“Mark does not look at a project strictly from the perspective of technology. He considers the needs and abilities of both the management and employees to find the best solution to a problem. His solutions meet short term budget constraints while keeping long term costs to a minimum.”

Steve Marino, AndrewsSchool.com

We offer **long-term service packages** customized to *your* needs. You can have an IT department without the expense of a full-time staff.

Special Projects

Norman Computers partners with top consultants to offer a number of special services to its customers. These services include:

- computer programming.
- Web site design.
- database design.
- business continuity plans.
- business continuity implementation.
- security systems.
- operations management.
- project management.
- graphic design.
- energy efficient “green” IT.

Business continuity

One of our most recent additions to our services, business continuity plans and implementation, have already proved one of our most popular. For a business, a natural or man-made hazard spells disaster if it means a business can't carry on as usual. Norman Computers, in partnership with Natural Hazards Consulting, works with businesses of all sizes to craft reasonable, realistic, and cost effective business continuity plans applicable to any situation requiring a divergence from standard operating procedures.
